>>>> **Automatically match your students with employers while controlling quality and managing progress**

You are facing new legal hiring requirements, increasing workloads, and decreasing budgets. How will you succeed? We have the answer.

Our web-based CSC Connect™ system automatically matches the *right* student with potential employers. It gives you complete control by monitoring job requests and approving the request if it meets your criteria. The system even integrates with your existing student management system, like SCT Banner®.
